

# Edlan Kuo

Austin, TX | (832) 755-7675 | Portfolio

LinkedIn | Github

A Full Stack Software Engineer who is passionate about simplifying everyday tasks. I enjoy creating applications focused on delivering an intuitive customer experience.

## EXPERIENCE

---

### Software Engineer - Freelance

Feb. 2023 - Present

*Technologies: Next.js, Typescript, MongoDB, TailwindCSS*

- Maintained an open-line communication with clients by providing daily updates on progress and addressing development issues to ensure the client was well informed.
- Designed and developed responsive company websites (SPAs) utilizing modern frameworks such as Next.js and TailwindCSS for the most elevated user experience.
- Gathered application analytics using PostHog and reported to clients while providing recommendations on future adjustments to increase user traffic.

### Full-Stack Software Engineer - Apprenticeship

July 2022 - Feb. 2023

*Technologies: HTML, CSS, Javascript, Node.js, Express, Jest, SQL, React*

- Developed over 50 full-stack applications from scratch to deployment, clocking in a total of 1000 hours of coding time to master the fundamentals of advanced web development.
- Held key positions in 3 separate week long sprints as team lead, ensuring quality of code and reaching MVP within the designated time frame.
- Mentored and guided peers on complex topics in order to aid in the team's growth as well as solidify my own knowledge of the intricate nature of code.

### Client Relations Account Manager | Digital Uprising LLC. Austin, Texas

Aug. 2020 - Dec. 2022

- Directly oversaw and maintained all 200+ user accounts for clients through Facebook and Gmail platforms ensuring quick response times in resolving internal issues as they arose.
- Handled invoicing of 12 clients at a time, each with their own negotiated rates based on the relationship built over time as well as internally gathered client reliability trends.
- Led company shift to operate on a new platform (Monday) that encouraged a more organized flow of data between departments, more efficient communication, and company scalability.

## EDUCATION

---

Alchemy Code Lab - Certificate of Professional Full-Stack Software Development

Feb. 2023
