EXPERIENCE

Software Engineer - Freelance

Dec 2022 - Sept 2023

- Designed and developed responsive company websites (SPAs) utilizing modern frameworks such as **Next.js**, **TailwindCSS**, and **Framer-Motion** to help market client's services.
- Gathered application analytics using **PostHog** to track user frequency, interaction, and overall site traffic.
- Collaborated with other freelance developers to help streamline their deliverables to clients.

Full-Stack Software Engineer - Apprenticeship

July 2022 - Feb 2023

- Developed over **50** full-stack applications from scratch to deployment, clocking in a total of **1000** hours of coding time to master the fundamentals of advanced web development.
- Led team of **4** developers as team lead in week long sprints, utilizing **agile methodologies** that resulted in a **30%** reduction in time to MVP.
- Built high-impact features using modern web development technologies such as **React**, **JavaScript**, **Node.js**, with **Jest** testing suites to ensure code remained robust throughout development.

PROJECTS

Craft Course Learning AI

Technologies: Typescript, TailwindCss, React, Prisma, PlanetScale, Next.js, OpenAI

- Developed a full-stack SaaS learning platform utilizing the power of AI to generate detailed units, chapters, and even an "end of course" quiz on any topic of choice.
- Integrated the usage of **OpenAI** with **Youtube's API** in order to query the most relevant video on the selected topic as well as transcribe a brief summary of that unit.
- Designed and implemented backend database relationships using Planetscale (**MySQL**) allowing users to experience more detailed chapters within each unit.

Ciao Recommendations Mobile App

Technologies: Typescript, TailwindCss, React Native, Node.js, SQL, PostgreSQL

- Designed and developed a full stack mobile social application allowing users to document notable destinations as recommendations during time of travel and share with friends or local community.
- Utilized point of interest data using **Google** and **Yelp's API** to enhance user experience in creating a recommendations post.
- Built a custom dynamic backend with **SQL**, **Node.js**, and **PostgreSQL**, mapping the many-to-many relationships with users, followers, and variation of posts.

EDUCATION

Alchemy Code Lab - Certificate of Professional Full-Stack Development

University of Houston - Bachelors of Science, Hotel Restaurant Management Honors

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, SQL, TypeScript

Frameworks/ Libraries: React, Next.js, React-Native, Node.js, Express, Jest, TailwindCSS

Database: Planetscale, MongoDB, PostgreSQL, Supabase, Firebase
